

## Member and Certified Member Renewal Rewards

The Society appreciates the participation and support of its members and certified members. Your membership and certification dues provide important financial support which allows the Society to accomplish its mission.

In return, you receive the benefit of being associated with an organization devoted to your profession or aspiration. In the first year(s) of membership, you also receive the benefits of Society documents, reports, and discounts on our training.

However, we also want to ensure that you receive benefits when you renew your membership or certification. For that reason, we have established the following Member and Certified Member Renewal Rewards. When you renew your membership or certification, these benefits become available to you.
